

The Department of Biochemistry at Brandeis University invites applications for a tenure track faculty position at the rank of assistant professor beginning Fall 2008. We are searching for a creative scientist who will establish a vigorous independent research program and also excel at teaching. The research program should address fundamental biological questions at the molecular level and complement existing Department strengths in analysis of protein structure and function. Research fields of particular interest include nucleic acid biochemistry, chemical biology, and biochemistry of complex systems.

Brandeis University offers the rare combination of an internationally recognized research university in a small college setting. The suburban campus is just 20 minutes from the bustling academic and biotechnology centers of Boston and Cambridge.

Brandeis University is an equal opportunity employer, committed to building a culturally diverse intellectual community, and strongly encourages applications from women and minority candidates.

Candidates should submit their CV, a brief research proposal and three letters of reference to:

Christopher Miller, Professor of Biochemistry
Brandeis University
MS 013
P.O. Box 549110
Waltham, MA 02454-9110

First consideration will be given to applications received by November 15, 2007.
