

## Plasmid Information

1022

Plasmid name	pVR2
Contents (What are the segments that the plasmid contains?)	Dros. Nuclein Heavy Chain (1-448) E. coli: BCCN (last 87)
Purpose (Why was it made? What is it to be used for?)	E. coli expression plasmid for 12448-B10
Source (List all DNA segments from which plasmid was assembled, or person/company obtained from and date)	pVR1 NdeI / Sgl I PRTC-CT (pT7-7) NdeI / Sgl I
Lab notebook reference (Number and page of lab notebook that describes plasmid assembly or first use)	
Plasmid prepared or obtained (Date? By whom?)	Vik <del>Rao</del> Rao
Vector (Source of plasmid origin of replication)	pT7-7
Antibiotic resistance genes	amp <sup>R</sup>
Bacterial strain used for plasmid preparation	JC10285
Computer file and directory	VR2.SEQ
This sheet filled out (Date? By whom?)	JG 11/9/94

WARNING

The computer file for this plasmid, VR2, contains a three nucleotide insertion which is not present in the actual plasmid. The sequence at 1640 bp in the file, which reads

...AAGCTTATCATCGAT...

should actually read

...AAGCTTATCGAT...

Please discard this warning and all erroneous printouts from the plasmid notebook when a corrected map is prepared.

This sheet inserted by HANS on 1/28/98.
